STOP THE PRESS! The famed Kon Tiki raft of explorer Thor Heyerdahl, on display in the Kon-Tiki Museum, Oslo, Norway, was used as a film location for a recent Danish pornographic flick. On a slow day at the museum, the film crew slipped in, roped off the room, and filmed the featured 'actors' aardvarking on the raft. The footage was shot before the staff at the museum were aware of the activities taking place on the deck of the venerable Kon Tiki.

Danish newspapers and magazines published x-rated photographs which we wish we could share with our readers. Although the images are a tad grainy, it is clear that the actors are not playing leap-frog.

A Rapanuiphile who wishes to remain anonymous created a limerick for this momentous happening:

A couple who liked their sex freaky  
Went to Oslo's Musée Kon Tiki.  
'Mongst the reeds of totora  
They played games from Gomorrah
